

# Cerberus Research Ltd Managed Internet Services

## **Do you:**

- *Want to share files across multiple locations?*
- *Want to leverage your investment in the Internet connectivity to connect multiple sites within your business in a secure fashion?*
- *Want to control website access for your staff?*
- *Want to control unauthorised access attempts to your business?*
- *Want to back up designated data to an off site storage facility overnight?*
- *Want to access the office remotely at any time?*
- *Make voice calls for the fraction of the cost of BT and others?*

## **AND**

- ***Do you want the management of it to be someone else's problem?***

## **Plus:**

- *Trap e-mail spam and viruses as they enter your business?*
- *Receive e-mail without using service providers servers?*
- *Host a website for Internal or External customers and suppliers?*

## **Theseus - Managed Security Focused Internet and Network Services**

Everybody needs IT - at least according to experts within the field! Maybe you do, but the knowledge needed to exploit the full potential of this area can be a time consuming diversion from your core business. Not anymore. Think of us as your dedicated IT security and infrastructure team providing a bespoke service that is aligned to your business needs and methods, turn your back on us and face your customers...

***Let us handle it! Let us handle IT!***

## Networking with Theseus

- *Networking your offices with low cost Internet connectivity means you can reduce your operational costs.*
- *No need for expensive servers at each location.*
- *Software licensing costs can be reduced through application centralisation.*
- *Share files and documents with other Windows™ users in your company avoiding duplication of effort and reducing administration overheads.*
- *Managed by Cerberus Research under their Theseus service.*

## Remote Working

- *Access systems from home or overseas either by laptop or PDA*
- *Don't rekey data - Do it once on the system from anywhere - securely.*

## More about the technology

*The technology takes the best of breed applications and systems that normally are installed separately and provides those applications and services PLUS the systems integration piece - the bit that glues them all together - in a single appliance. We use :*

- *IPSEC (3DES, AES, Blowfish)*
- *SSL*
- *VOIP*
- *SSH*

## More about Cerberus Research

The Cerberus team has many years experience as providers of IT security, network and Infrastructure management and consultancy services to leading banks and City institutions as well as FTSE 100 companies and global communications providers.

In designing Theseus, over a 2 year research and development cycle , Cerberus Research set out to design a complete Internet infrastructure in a single appliance which would provide smaller companies with the level of security and network flexibility which are standard in large organisations but prohibitive in terms of cost and resource overheads until now.

Cerberus Research endeavours to ensure that the information in this document is correct and fairly stated, but does not accept any liability for any error or omission . The development of Cerberus Research products and services is continuous and published information may not always be up to date. It is important to check the current position with Cerberus Research.
